

GIORGIO PIOTTO

LIVING YOUR ITALIAN DREAM

For over 40 years, an indisputable internationally known brand, Giorgio Piotto owes such reputation to the craftsmen with whom he creates and manufactures his products. Giorgio Piotto, the company owner, has transformed the family workshop in an artisan company with a contemporary and refined approach.

He continues today his search towards the realization of complete furnishing, for a home that is founded on aesthetics and beauty, united by the passion for wood and nature. Today, more than ever, wood is the true protagonist. An age-old living material which gives inspiration to artists and craftsmen alike ... unique and inimitable. All furniture and boiseries are made of the noblest solid woods such as walnut, cherry and oak. Each production phase, of every single product, is carefully checked: from the selection of wood, its distinguishing flame and grain, to the sanding and transformation, the chiselling of the woodworker, whose highly skilled carvings and inlays enhance the quality, to the polishing and finishing with stains and patinas, wax, colours and silver and gold leaf. Addressing the market of large supplies, Giorgio Piotto is the answer to the search for solutions of exclusive luxury, fully satisfying the criteria for the realization of contract projects, such as prestigious residences and luxury hotels.

Giorgio Piotto is a significant choice for those working in the sector, both in terms of product and service.

Design, creativity and style characterize its production which is entirely made in Italy by highly qualified personnel. Functionality and quality of materials contribute to the durability of Giorgio Piotto furniture, which

is made with efficient technologies that respect the environment.

The handmade production guarantees a high level of customization. The high quality of the design makes each item unique and allows the creation of new and refined ambiances. Evocations of the past live again today in ambiances where new emotions are revealed. The company offers interior furniture solutions that can be fully customised. It devotes personalised attention to each client and offers bespoke solutions where the interior plan is infused with the aesthetic factor, making each setting special.
